## Regional Summary (Week 11)

- 1) Most of disasters occurred in Indonesia were due to hydro-meteorological hazards with floods and landslide recorded. AHA Centre also monitored several strong wind events in Indonesia, although they did not caused any damages and disaster declaration.
- 2) In Philippines, geological hazards still disrupting daily lives of people with Mount Mayon volcanic activities in Albay Province. Also, M 5.0 earthquake was recorded in Bukidnon Province on 15 March 2018, with Talakag city felt intensity V and VI (MMI) and it caused some damages.
- 3) [AHA Centre](#) also monitored the development and trajectory of **Tropical Cyclone Marcus** since 16 March 2018 in north part of Australia. Although [BMKG](#) triggered warnings for high waves in Arafura Sea and intense rainfall for some provinces in eastern part of Indonesia, there were no casualties and damages reported. TC Marcus is currently moving away from ASEAN region.
- 4) ASEAN Specialised Meteorological Centre ([ASMC](#)) maintains Alert Level 2 for the northern part of ASEAN region, which means there are 150 hotspots in 2 consecutive days with dense smoke plumes; dry weather persisting; and prevailing winds blowing towards ASEAN countries.
- 5) All disasters occurred in Week 11 were within the capacity of respective ASEAN Member States.
