WEEKLY DISASTER UPDATE

21 – 27 May 2018

ONE ASEAN ONE RESPONSE

- 100 - 1K people affected
- 1K - 10K people affected
- 10 K - 100 K people affected
- More than 100K people affected

S/N	Date	Country, Disaster Log and Key Updates
1	21-24 May 2018	Indonesia, Merapi Volcano Phreatic Eruption, Central Java http://adinet.ahacentre.org/reports/view/1165
2	21 May 2018	Viet Nam, Landslide in Can Tho city adinet.ahacentre.org/reports/view/1167
3	21 May 2018	Thailand, Strong Wind in Muang District, Mae Hong Son http://adinet.ahacentre.org/reports/view/1169
4	25 May 2018	Indonesia, Flood in North Konawe regency, Southeast Sulawesi http://adinet.ahacentre.org/reports/view/1161
5	25 May 2018	Indonesia, Flood in Pekalongan regency, Central Java http://adinet.ahacentre.org/reports/view/1162
6	25 May 2018	Indonesia, Flood in Tegal city, Central Java http://adinet.ahacentre.org/reports/view/1163
7	25 May 2018	Indonesia, Strong Wind in Kuningan regency, West Java http://adinet.ahacentre.org/reports/view/1164
8	26 May 2018	Cambodia, Strom in Kampong Cham http://adinet.ahacentre.org/reports/view/1168
9	27 May 2018	Malaysia, Flood in Western Peninsula http://adinet.ahacentre.org/reports/view/1166

Regional Summary (Week 21)

- Most of disasters occurred in Week 21 were hydro-meteorological in nature with floods in Indonesia and Malaysia; strong wind in Cambodia, Thailand and Indonesia. In addition, a landslide in Viet Nam was caused by erosion in a river bank and there was an increasing activities with Merapi Volcano in Indonesia.
- Merapi Volcano phreatic eruptions were observed in Week 21 and it continued to release white volcanic plume. With the increasing activities of Merapi Volcano, Indonesia, [BNPB and PVMBG](#) released the "Check Position" tool to enhance preparedness of general public, [see page 2](#).
- In Indonesia, [PVMBG](#) maintains Alert Level IV (Warning) for Sinabung Volcano, North Sumatra, and Alert Level III (Watch) for Agung Volcano, Bali. In Philippines, [PHIVOLCS](#) maintains Alert Level 2 for Mayon Volcano and Kanlaon Volcano.
- On earthquake activities, in Indonesia, there were 8 earthquakes registered \geq M 5.0 with intensities reported around II-IV MMI, and none of them resulted in significant damages and casualties ([BMKG](#)). Meanwhile, all earthquakes in Philippines on Week 21 were registered $<$ M 5.0 and no threats to the population ([PHIVOLCS](#)).
- As of 27 May 2018, ASEAN Specialised Meteorological Centre ([ASMC](#)) suggested that wet weather continued to prevail for the region. With focus on Myanmar, the low pressure area over the East-central Bay of Bengal still persists. Monsoon is moderate over the Andaman Sea and Southeast Bay of Bengal, with Weather is partly cloudy over the North Bay and cloudy elsewhere over the Bay of Bengal ([DMH](#), Myanmar).
- All disasters occurred in Week 21 were within the capacity of respective ASEAN Member States.

REGIONAL TALLY

Affected population: **4,186***
Affected families: **991***

*AHA Centre's estimation based on total number of deaths, injuries and IDPs reported by National Disaster Management Offices (NDMOs) of each ASEAN Member State and other verified sources.

DISCLAIMER

The AHA Centre was established in November 2011 by the Association of Southeast Asian Nations (ASEAN) Member States to facilitate cooperation and coordination among Member States, relevant agencies of the United Nations and international organisations in disaster management and humanitarian assistance.

This update consists of significant natural disaster events that occur in ASEAN Member States, including Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia,

Myanmar, Philippines, Singapore, Thailand and Viet Nam. The disasters recorded include Drought, Flood, Earthquake, Tsunami, Volcano, Wind, Landslide and Storm.

The use of boundaries, geographic names, related information and potential considerations for response are for reference, not warranted to be error free or implying official endorsement from ASEAN Member States.
