

S/N	Date	Country, Disaster Log and Key Updates
1	22 Dec 2018 - ongoing	Indonesia, Tsunami in Sunda Strait http://adinet.ahacentre.org/reports/view/1383
2	29 Dec 2018 - ongoing	Philippines, Tropical Depression "Usman" http://adinet.ahacentre.org/reports/view/1384
3	31 Dec 2018	Indonesia, Landslide in West Java http://adinet.ahacentre.org/reports/view/1390
4	1 Jan 2019	Indonesia, Floods in West Sumbawa http://adinet.ahacentre.org/reports/view/1391
5	1 Jan 2019	Indonesia, Strong winds in Pinrang http://adinet.ahacentre.org/reports/view/1392
6	1 Jan 2019	Indonesia, Flash flood in Lampung http://adinet.ahacentre.org/reports/view/1389
7	5 Jan 2019	Thailand, Tropical Storm Pabuk http://adinet.ahacentre.org/reports/view/1388

Regional Summary of Week 1, and Outlook for Week 2

- In Week 1, a tropical storm was reported in the Gulf of Thailand making landfall in the southern provinces bringing heavy rainfall. Occasional thundershowers will be likely in some of the upper South Thailand. Northeastern provinces of Peninsular Malaysia was expected to receive heavy rainfall. People should beware of the severe conditions that cause forest runoffs and flash floods. ([Thai Met Department](#), [MetMalaysia](#))
- In the first week of the fortnight (Week 1 and 2), a northeast monsoon surge is expected to bring wetter conditions over the South China Sea and over coastal Thailand and Viet Nam. Elsewhere in the Mekong sub-region, cooler conditions can be expected. The stronger monsoonal winds are likely to bring wetter weather to areas around the Java Sea as well. Conversely drier conditions are expected over the Philippines. By week 2, the wetter conditions over the South China Sea are likely to spread southward to affect the north-eastern coast of Peninsular Malaysia and southern Thailand. Areas around the Java Sea are likely to become drier during the week.
- 18 earthquakes of M5.0 were reported for the last week in the region. Activity from the volcanoes under monitoring remain status quo. Forecasts of potential areas of land movement in Indonesia in January 2019 compared to December 2018, generally the potential remains high and increases are increasingly expanding to most parts of Indonesia. ([PVMGBG](#), [PHIVOLCS](#), [BMKG](#))
- All reported disasters were within the coping capacity of the member states.

REGIONAL TALLY

Affected population: **1,246,709*** # Affected families: **154,969*** # Displaced: **163,430***

*AHA Centre's estimation based on total number of deaths, injuries and IDPs reported/confirmed by National Disaster Management Offices (NDMOs) of each ASEAN Member State and other verified sources.

DISCLAIMER

The AHA Centre was established in November 2011 by the Association of Southeast Asian Nations (ASEAN) Member States to facilitate cooperation and coordination among Member States, relevant agencies of the United Nations and international organisations in disaster management and humanitarian assistance.

This update consists of significant natural disaster events that occur in ASEAN Member States, including Brunei Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia,

Myanmar, Philippines, Singapore, Thailand and Viet Nam. The disasters recorded include Drought, Flood, Earthquake, Tsunami, Volcano, Wind, Landslide and Storm.

The use of boundaries, geographic names, related information and potential considerations for response are for reference, not warranted to be error free or implying official endorsement from ASEAN Member States.
