DISCLAIMER

The AHA Centre was established in November 2011 by the
Association of Southeast Asian Nations (ASEAN) Member
States to facilitate cooperation and coordination among
Member States, relevant agencies of the United Nations
and international organisations in disaster management and
emergency response.

This update consists of significant natural disaster events
that occurred in ASEAN Member States – Brunei
Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia,
Myanmar, Philippines, Singapore, Thailand, and Viet Nam.
The disasters recorded include Drought, Flood, Earthquake,
Tsunami, Volcano, Wind, Landslide, and Storm.

The use of boundaries, geographic names, related
information, and potential considerations for response are
for references, not warranted to be error-free or implying
official endorsement from ASEAN Member States.

REGIONAL TALLY

Note: Estimations are based on data reported/confirmed by National
Disaster Management Organisations of each respective ASEAN Member
State and other verified sources

REGIONAL SUMMARY:

The Tropical Storm SINLAKU has brought heavy precipitation which caused
flooding in multiple region of Thailand, Lao PDR, and Viet Nam as reported
by [Floodlist](#). Vietnam's Disaster Management Authority ([VNDMA](#)) said
strong winds and heavy rain from Sinlaku caused damages in Quang Ninh,
Hoa Binh, Nghe An, Ha Tinh and Binh Dinh provinces on 02 August, 2020.
Cam Pha in Quang Ninh recorded 368mm of rain in 24 hours to 02 August.
In Lao PDR, local media reported heavy rainfall across the country. Flooding
affected parts of Xayaboury Province in particular after rain increased levels
of the Nam Hong River. Meanwhile in Thailand, the worst of the flooding
occurred in Loei province where around 680 homes were damaged across
the districts of Muang, Chiang Khan and Pak Chom. Levels of the Mekong
River in Chiang Khan increased by 70cm.

HIGHLIGHT:

The influence of the storm (SINLAKU) hit Thailand which brings in heavy to
very-heavy rainfall in some places which caused multiple hazards
(floodings, windstorms, and mudslides). The flood affected 22,238
households, 3 deaths (Nong Bua Lamphu Province) which is caused by the
overflowing water in Phitsanulok Province, Udon Thani Province.

HYDRO-METEO-CLIMATOLOGICAL:
