DISCLAIMER

The AHA Centre was established in November 2011 by the
Association of Southeast Asian Nations (ASEAN) Member
States to facilitate cooperation and coordination among
Member States, relevant agencies of the United Nations
and international organisations in disaster management and
emergency response.

This update consists of significant natural disaster events
that occurred in ASEAN Member States – Brunei
Darussalam, Cambodia, Indonesia, Lao PDR, Malaysia,
Myanmar, Philippines, Singapore, Thailand, and Viet Nam.
The disasters recorded include Drought, Flood, Earthquake,
Tsunami, Volcano, Wind, Landslide, and Storm.

The use of boundaries, geographic names, related
information, and potential considerations for response are
for references, not warranted to be error-free or implying
official endorsement from ASEAN Member States.

REGIONAL SUMMARY:

A total of 20 disasters (15 floods, 2 landslides, 2 wind-related, and 1 storm) affected the region in the nineteenth week of 2021. Indonesia and the Philippines have reportedly been affected. Several localised heavy rainfall which caused some rivers to overflow triggered floods in Indonesia as reported by Indonesia's Badan Nasional Penanggulangan Bencana ([BNPB](#)). Tropical Storm 03W affected several provinces in Davao and Zamboanga in the Philippines as reported by the National Disaster Risk Reduction and Management Council ([NDRRMC](#)).

HIGHLIGHT:

According to the reports from the [NDRRMC](#), on 13 May, the low pressure area east of Davao City, Philippines developed into a Tropical Depression. In the afternoon of the same day, as it continued to move west-northwestward, it developed into a Tropical Storm with local name "Crising" and by evening, made landfall and weakened back to a Tropical Depression-grade system. "Crising" further weakened into a low pressure area by 14 May and has affected 12,733 families (62,760 persons) and displaced 8,710 people into three evacuation centres and to homes of relatives and friends. Almost a hundred houses suffered damages due to the storm. The NDRRMC has maintained RED alert status since the start of COVID-19 response operations.

HYDRO-METEO-CLIMATOLOGICAL:
